

## Unique Features

### \* Massage functions with Rich Variation

Realize ideal relaxation with all available technologies. For the back, seat and calves, a rich variation of massage techniques and unique programming make for a close to "human touch" sensation.

### \* Shiatsu Point Locator Function

Automatically locates shiatsu points which vary by person by person. This enables effective massage meeting your body type or purpose.

### \* See-Saw 3D Roller Function

The see-saw 3D Roller mechanism offers a maximum extrusion of up to 6cm for deep kneading. Realize deep massage with the state-of-the-art technologies.

### \* Vibration Massage Function

Vibration mechanisms are located in the seat, footrest and chair back

### \* Foot Slide Function

The Footrest activates whenever you choose to recline the seat back. Once you reach the desired reclining position, the footrest automatically slides in or out to match your specific height.

### \* Automatic Reclining Function

The seat back can be reclined to any angle between 120° and 170°. The footrest can be raised to a 90° angle. Both can be adjusted to find the most comfortable position for you.

### \* Personal Memory Function

Allows you to save the air pressure settings for each air massage component of the Healthcare Programs and Manual Selection massage. You can choose 1– 4 from the Personal Memory buttons.

## Specifications
